

1U enclosure holds two KG-255X, three KG-250X(-FC), or four KG-250XS INEs.

The universal shelf from Viasat is designed to house two KG-255X units, three KG-250X(-FC) units, or four KG-250XS units in a 1U (1.75 in) enclosure for standard 19 in. equipment racks. The enclosure features smooth-sliding mounting rails for front access to the entire unit, enabling easy loading, unloading, and access to the devices inside. Slide rail extensions adapt for use in racks 24 to 35 inches deep. For installations that require rails longer than 35 inches, please contact Viasat for availability.

A ground stud on the rear bottom surface of the tray facilitates grounding. Cable tie wraps are included to secure the standard power supplies and cables supplied with all Viasat INEs, and to secure Ethernet cables in the enclosure.

RACK MOUNT FEATURES

- » 1U (1.75 in) enclosure
