

# Eclypt® Hardware-Based Encryption

Hard Drive Encryption for Protecting NATO Cosmic Top Secret through Unclassified Data-At-Rest

## ECLYPT HARD DRIVE ENCRYPTION IS NATO-APPROVED TO PROTECT NATO CLASSIFIED DATA AGAINST BREACH AND THEFT

[WikiLeaks. Lost laptops. Stolen information.](#) »»» NATO nations face data breaches every month, putting NATO's classified data at risk. Eclipt data-at-rest security hardware is NATO-approved to encrypt data of any classification level from Cosmic Top Secret to Unclassified, rendering the hard drive protected from compromise. With hardware-based self-encrypting technology, Eclipt delivers higher security with better performance than software-based encryption. In the event of computer theft, loss, or attack, Eclipt ensures that your data is completely secure.

With Eclipt hard drive encryption, you can reduce the classification level and handling requirements of your data when your computer is powered down. Even Cosmic Top Secret data can be rendered unclassified with Eclipt, freeing you from logistics associated with storing and transporting classified data. Hardware-based Eclipt data encryption is available in a variety of configurations: Core internal hard drive, Freedom external hard drive, Nano ultra-portable memory stick, and Inline media encryptor. Simply choose the optimal Eclipt protection level and form factor to meet your data-at-rest security needs.

### WHICH ECLYPT DEVICE IS RIGHT FOR YOU?

CLASSIFICATION LEVEL	Encrypted Data is Rendered Unclassified			
	ECLYPT 800 (AVAILABLE IN INLINE MEDIA ENCRYPTORS)	ECLYPT 600 (AVAILABLE IN CORE & FREEDOM)	ECLYPT 300 (AVAILABLE IN CORE & FREEDOM)	ECLYPT 200 (AVAILABLE IN CORE, FREEDOM, & NANO)
NATO COSMIC TOP SECRET	✓			
NATO SECRET		✓		
NATO CONFIDENTIAL		✓		
NATO RESTRICTED			✓	
NATO UNCLASSIFIED				✓

REDUCTION IN PROTECTIVE MARKING BY ENCRYPTION  
 RECOMMENDED CHOICE

## INSIDE YOUR COMPUTER

### EMBEDDED DATA PROTECTION IN YOUR COMPUTER'S CORE

#### ECLYPT CORE INTERNAL HARD DRIVES

Direct encrypted replacement for a standard computer internal hard drive.

- » Protects NATO Secret & Below data; encryption reduces the protective marking and handling requirements of the data
- » Available in protection levels 600, 300, and 200 to match your authentication and NATO data classification needs

#### KG-200 WORKSTATION INLINE MEDIA ENCRYPTOR

Positioned between a computer's processor and hard drive, this Eclypt device protects data-at-rest on classified desktop and server computers.

- » Protects NATO Cosmic Top Secret & Below
- » Encryption renders the disk drive unclassified
- » Protection level Eclypt 800

## OUTSIDE YOUR COMPUTER

### THE FREEDOM TO WORK ON THE GO AND SWITCH COMPUTERS WITH PORTABLE DATA PROTECTION

#### ECLYPT FREEDOM EXTERNAL HARD DRIVES

Direct encrypted replacement for a standard computer internal hard drive.

- » Protects NATO Secret & Below data; encryption reduces the protective marking and handling requirements of the data
- » Available in protection levels 600, 300, and 200 to match your authentication and NATO data classification needs

#### ECLYPT NANO USB MEMORY STICK

Encrypted USB memory stick delivers AES-256 full-disk encryption and MIL-STD 810F rugged, waterproof performance in a portable thumb drive.

- » Protects sensitive (unclassified) data
- » Protection level Eclypt 200

#### KG-201 PORTABLE INLINE MEDIA ENCRYPTOR

External device that houses and encrypts a 2.5" ATA-6 classified hard drive, and connects via USB to your laptop.

- » Protects NATO Cosmic Top Secret & Below
- » Encryption renders the drive unclassified
- » Protection level Eclypt 800
