

**CFV 774278 030822**

**Responsible Party:** Viasat  
6155 El Camino Real,  
Carlsbad  
California  
USA

**Type of GHG Statement:**  
Organisational

**Identification of GHG Statement:**  
FY22\_GHG Report\_Aug 2nd\_Final

**Scope of activities:**  
The design, assembly, administration and servicing for commercial, military and aerospace communication networks and equipment

**Organisational Boundary:**  
Operational Control

**Sites Included in Organisational Boundary:**  
See Appendix A

**Exclusions from Organisational Boundary:**  
Viasat completed the purchase of RigNet in FY22 but has not included emission source activity data into this GHG report due to the incomplete availability of data due to systems integration activity

**Reporting Boundary:**  
Scope 1 - natural gas, diesel, gasoline, fugitive refrigerants  
Scope 2 - indirect emissions from electricity

**Exclusions from Reporting Boundary:**  
GHG emissions from a small fleet of international vehicles was not included due to a lack of international fleet vehicle data

**Criteria for developing the organisational GHG Inventory:**  
ISO14064-1:2006  
GHG Protocol  
Viasat GHG Accounting Procedure

**Level of Assurance:** Limited

**Materiality level:** 10%

**Period:** 31<sup>st</sup> March 2021 – 1<sup>st</sup> April 2022

**GHG Emissions:**

CO2(e)	Location Based	Market Based
Direct Emissions (Scope 1)	2,431	2,431
Indirect Emissions from energy (Scope 2)	25,718	26,264
Total	28,149	28,694

**Verification Opinion: Verified with Comments**

Based on the process and procedures conducted, there is no evidence that the FY22\_GHG Report\_Aug 2nd\_Final produced by Viasat:

- is not materially correct and is not a fair representation of GHG data and information;
- has not been prepared in accordance with ISO14064-1:2006

- Viasat’s GHG inventory quality management system was not found to be robust in the accuracy checks and periodic internal audits and technical reviews of the data. All errors were corrected as part of the verification
- Viasat has not used their document retention and record keepings procedures within their environmental management system to control the issue and maintenance of their Greenhouse gas (GHG) accounting procedure

The following improvements were raised in relation to future reporting:

- It could be beneficial Viasat if Measurabl informed them of any modifications to the data within the system once VIASAT have reviewed the data
- The Greenhouse gas (GHG) Accounting procedure could be improved to ensure completeness of emission sources within the boundary
- The activity data for gateways and ground infrastructure could be improved using actual consumption activity data rather than energy cost data
- The reporting from data centers could be improved by using actual consumption data and reporting internally on a more regular basis

**Verification Activities:**

The following were the verification activities undertaken:

- Evaluation of the monitoring and controls systems through interviewing employees observation & inquiry
- Verification of the data through sampling recalculation, retracing, cross checking, reconciliation

The quantification and reporting of the GHG emissions has been independently verified by BSI against the specifications defined in ISO 14064-1:2006. The verification activity has been carried out in accordance with ISO 14064-3 and the principles of ISO 14065

The verification activities applied in a limited level of assurance verification are less extensive in nature, timing and extent than in a reasonable level of assurance verification

**Responsibilities:**

The data on which the GHG emissions are based has been provided by Viasat in the document FY22\_GHG Report\_Aug 2nd\_Final. This document is the responsibility of Viasat and is historical in nature.

Viasat is responsible for the preparation and fair presentation of the GHG statement in accordance with the criteria.

BSI is responsible for expressing an opinion on the GHG statement based on the verification

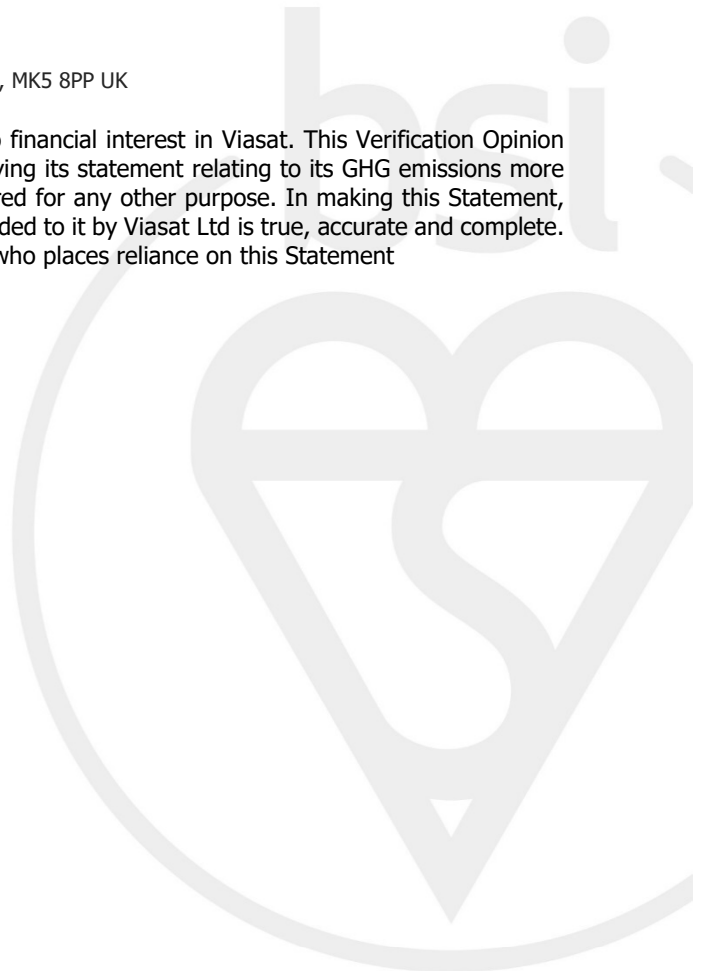

**Lead Verifier:** Amanda Pakes

**Signed on behalf of BSI:** Matt Page - Managing Director UK and Ireland

**Issue Date:** 3<sup>rd</sup> August 2022

BSI Assurance UK Ltd, Kitemark Court, Davy Avenue, Milton Keynes, MK5 8PP UK

**NOTE:** BSI Assurance UK Ltd is independent to and has no financial interest in Viasat. This Verification Opinion has been prepared for Viasat only for the purposes of verifying its statement relating to its GHG emissions more particularly described in the scope above. It was not prepared for any other purpose. In making this Statement, BSI Assurance UK Ltd has assumed that all information provided to it by Viasat Ltd is true, accurate and complete. BSI Assurance UK Ltd accepts no liability to any third party who places reliance on this Statement
