

Environmental, Health, and Safety Policy

As a global communications company Viasat believes everything is connected, and we strive to connect people and businesses in the same way. Viasat recognizes the impacts our products and operations have across the globe and within the communities where we work. Thus, we are committed to environmental protection and sustainability, pollution prevention, risk reduction, compliance, and fostering a positive environmental, health and safety culture that promotes the wellbeing of individuals, their working conditions, and our planet.

Viasat is committed to:

1. Proactively engage with stakeholders to meet or exceed all applicable environmental, health and safety compliance obligations and other requirements.
2. Exercise responsible resource management through the design, procurement, and manufacturing aspects for our business.
3. Reduce health and safety risk by working towards the elimination or practical minimization of work-related hazards.
4. Influence, engage, and empower our global workers utilizing effective consultation, participation, and communication methods with respect to environmental, health and safety issues.

Viasat's leadership team is committed to support and provide resources that empower a healthy and safe workplace for our workers and contractors. Our local teams set objectives, and monitor and implement best management practices applicable to the EHS aspects of our operations and facilities. We are committed to reducing our impacts through continual improvements of our EHS management system and engaging our employees to participate in initiatives aimed at keeping each other safe and reducing our environmental footprint.
