CYBERSECURITY SERVICES FOR ENERGY IT & OT ENVIRONMENTS

Viasat's Security Operation Center (SOC) is designed to provide real-time threat detection, network visualization, and timely mitigation response using our advanced intrusion detection & prevention tools. Our SOC illuminates the most complex cyber-physical ecosystems, detecting, analyzing, and responding to threats and vulnerabilities to safeguard the integrity of industrial technologies in both IT & OT environments.

1. DETECTION   2. ANALYSIS & MITIGATION   3. 24/7 MONITORING CAPABILITIES
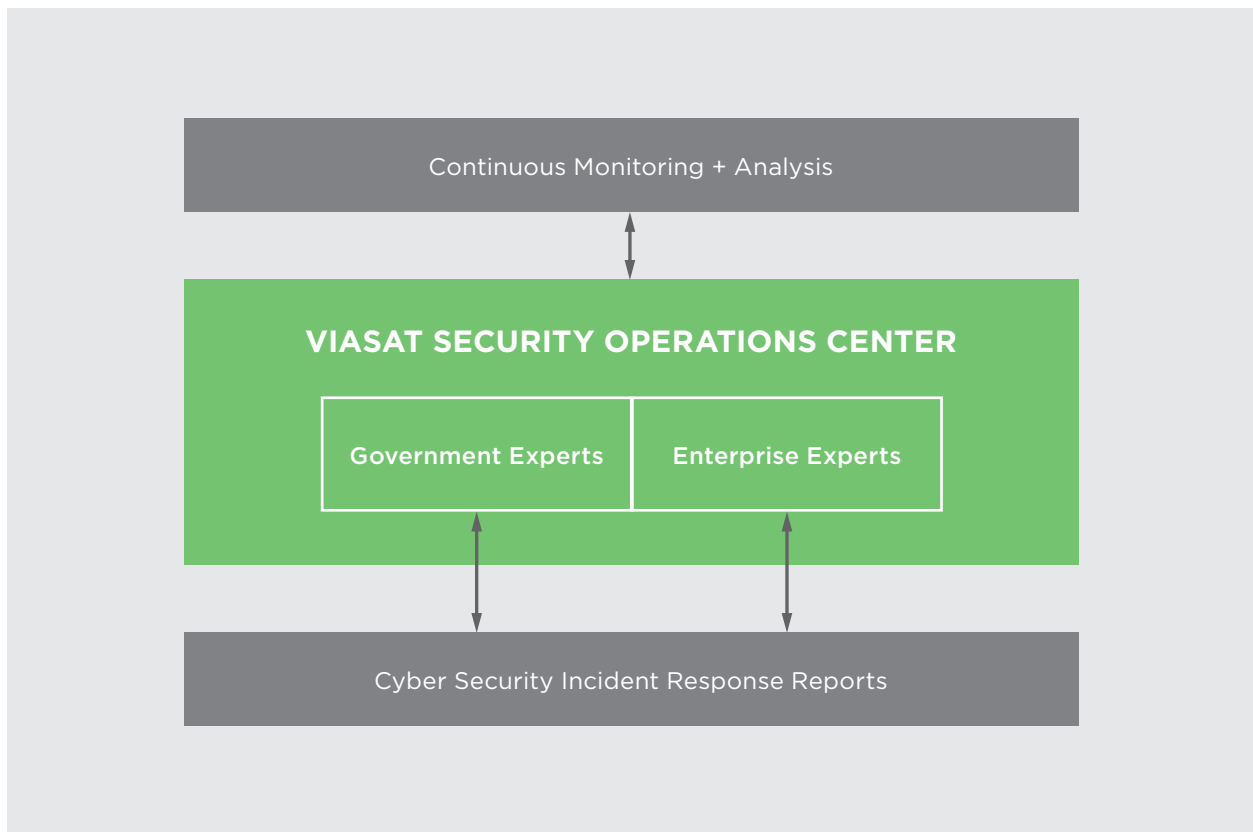

Viasat

24/7 SECURITY MANAGEMENT

The quicker a threat is identified, the less harm it can do. That's why around-the-clock monitoring and deeper analysis of suspicious activity are critical to keeping your network safe. Our highly-cleared and certified experts leverage the latest technologies and techniques to seamlessly report issues and help provide fix actions to prevent and stop attacks before they become a problem.

Security Management Services

» 24/7 Security Operations Center

» Incident response with easy-to-understand fix actions

» Preventing, detecting, analyzing, and responding to cybersecurity incidents

» Customizable reports and metrics to support various levels of stakeholders

» Top of the line AI deep learning of the network

» IT/OT security monitoring

Continuous Monitoring + Analysis
