Includes web browsing and web-based tools (e.g., Google, Microsoft Office 365, Adobe Creative Suite), bulk transfers (e.g., Dropbox, SharePoint), real-time communications (e.g., Zoom, Slack, Microsoft Teams), network storage (e.g., iDrive, SharePoint), social networking (excluding embedded streaming videos), VPN, and email. Not all internet traffic sources are identifiable and available to benefit from Office Hours. Office Hours does not include video streaming, real-time entertainment, peer-to-peer networking, gaming, and any other categories of internet content not specifically stated above. Available time may vary by location. Please speak with a customer representative to be sure your applications qualify. If you use an application that falls under one of the above-mentioned categories of internet content but is not included, please contact Viasat at feature-request@viasat.com to request for the application to be added to Office Hours. For additional details, visit <https://help.viasat.com/s/article/Office-Hours-FAQs>
