

BRINGING A SEA OF CHANGE TO MARITIME CONNECTIVITY.

Maritime internet for leisure yachts.

Viasat™ 

Unmatched. Unrivalled. Unbelievable.

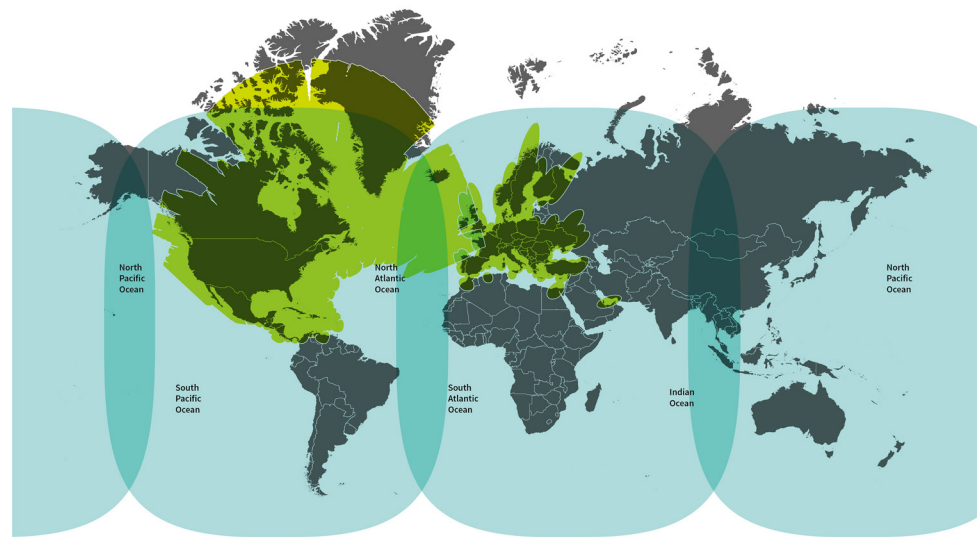

Best-in-class internet for leisure yachts.

No other provider offers enhanced maritime connectivity like Viasat. Our game-changing technology delivers unparalleled bandwidth for superior internet experiences that keep your vessel connected efficiently while also allowing yacht owners, guests, and crew to stream, browse, and watch movies just as they would at home or in the office.

A better connection starts in the sky.

Connecting to Viasat's high-capacity satellite network doesn't need to be complicated. With professionally installed equipment that delivers more performance, reliability, and personalization, accessing the internet on board has never been easier. With Viasat you get superior internet for happier passengers, smoother operations, and higher crew morale. Easily access high-performing connectivity with no speed limits**, so everyone can connect, even at the same time.

And it's only going to get better. With the upcoming launch of the ViaSat-3 global constellation, high-speed broadband will be available to vessels virtually anywhere the seas can take you.

-  Current Ka Coverage
-  Future Ka Coverage

Advanced technology

- › **Our powerful, high-capacity satellite network means more speed, data, and performance while you cruise.**
- › At-home or office internet experience at sea
- › No hard data caps*
- › No speed limits**

Unrivalled connectivity

- › **We deliver fast, seamless internet for everyone on board.**
- › Operates on Viasat's high-capacity satellite connectivity platform
- › Utilize proven and reliable Cobham SAILOR equipment
- › Affordable plans with flexible terms

Best internet experience

- › **Today's guests expect the best – and we help you deliver it.**
- › Keep everyone connected to work and family
- › Provide access to HD video streaming, movies, TV, and sports

* "No data caps" means users on Viasat maritime network will have premium priority until data consumption reaches the allocation stated in their specific maritime plan. After this data consumption, and only in instances of high network utilization, standard priority will be given, which could result in slower speeds.

**No speed limits means that there is no cap set on the typical speed delivered within a specific maritime plan. Speeds may still be limited by terminal equipment capabilities, network and environmental conditions, and other factors. Speeds are "up to," are not guaranteed and will vary. Typical speeds range between 25 Mbps and 50 Mbps.

Leisure plans customized for you

Viasat offers plan packages to meet your unique requirements for yacht owners, guests, and crew.

- › Flexible plans tailored to meet your specific needs. Whether you have 5 passengers and crew on board or over 40 passengers and crew, Viasat has a plan suited for you!
- › All plans feature no hard data caps, no speed limits, and no overages. Remove any uncertainty about your airtime bill by receiving a fixed monthly price.
- › We offer maximum flexibility with our Quiet Time plan for when the yacht is not in use.

Stay connected to stay productive.

Viasat's high-speed maritime internet keeps you connected while you're at sea so you can continue business as usual. Upload/download critical data and information while maintaining a private and secure network. Provide passengers and crew with the internet so they can connect to loved ones, entertainment, and work, without slowing down the network needed for operations.

Ready to connect to game-changing maritime internet?

With Viasat's choice of plans, you can manage costs while accessing only the features you want and need.
