

Environmental Policy 2.0

As a global provider of satellite broadband and wireless services, infrastructure, and technology, we are committed to environmental protection and our role in the prevention of pollution within our local and greater communities. Viasat is an environmentally conscious company, and we acknowledge the potential environmental impact that our operations have on the environment.

Goals: We get it done!

- › We recognize, communicate, and educate the Viasat community on relevant environmental issues regulations, and objectives.
- › We perform design, procurement, manufacturing, and operations activities in a manner that reduces pollution and minimizes waste where feasible.
- › We focus on life-cycle thinking to ensure consideration of environmental aspects from development to end-of-life.
- › We conserve resources by promoting recycling of applicable waste products in design and across Viasat's campuses.
- › We reduce waste by monitoring and controlling procurement, storage, disposal and energy usage.
- › We support Viasat's position as a good steward of the environment.

Regulatory Compliance: It's the law!

Viasat is committed to meeting environmental compliance obligations that apply to our company's business.

Environmental Management System: We have the power!

Top management champions our commitment to the environment by empowering a team to implement, monitor, and continually improve our Environmental Management System to enhance environmental performance. This is facilitated through environmental objectives based on our significant environmental aspects, compliance obligations, and considering our environmental and business risks and opportunities.

Engage: Working together!

We foster a community of employees, contractors, suppliers, and customers that value the environment and work towards prevention of pollution. Our commitment extends beyond our own company to engage our local community to prevent and reduce pollution.

Nurture: Spread the word!

We communicate this policy to our employees and to those who do work on our behalf. We review it annually to ensure its implementation is effective and that the policy continues to address environmental aspects that are appropriate to the nature, scale, aspects, and impacts of Viasat's environmental objectives, activities, products and services.
