

PROTECTING CANADA'S CLASSIFIED AND SENSITIVE DATA WITH HARDWARE-BASED ENCRYPTION

Data at rest is data at risk. »»» More and more computers are lost or stolen from government and commercial organizations each year, putting Canada's classified and sensitive data at risk for breach. ViaSat Eclipt secure data-at-rest hardware encrypts data of any classification level from Top Secret to Protected/Unclassified, rendering the hard drive safe from compromise. With hardware-based self-encrypting technology, these devices deliver higher security with better performance than software-based encryption. In the event of computer theft, loss, or attack, ViaSat ensures that your data is completely protected and secure.

With hard drive encryption from ViaSat, you can reduce the classification level and handling requirements of your data when your computer is powered down. This technology secures Canadian Top Secret, Secret, Confidential, and Protected C data with encryption that reduces the security classification handling requirements down two levels. Protected A and B data can also be secured.

Hardware-based ViaSat Eclipt data encryption is available in a variety of configurations. Simply choose the optimal protection level and form factor to meet your data-at-rest security needs:

WHICH ENCRYPTED DRIVE IS RIGHT FOR YOUR DATA?

		CLASSIFICATION LEVEL	
DEPARTMENT OF NATIONAL DEFENCE	TOP SECRET		✓
CANADIAN FORCES	SECRET		✓
FEDERAL GOVERNMENT	CONFIDENTIAL		✓
LAW ENFORCEMENT	PROTECTED C (UNCLASSIFIED)		✓
LOCAL GOVERNMENT	PROTECTED B (UNCLASSIFIED)		✓
HEALTH SERVICES	PROTECTED A (UNCLASSIFIED)		✓
BANKING / FINANCE	PROTECTED B (UNCLASSIFIED)		✓
ENTERPRISE/CORPORATIONS	PROTECTED A (UNCLASSIFIED)		✓

REDUCTION IN CLASSIFICATION LEVEL BY ENCRYPTION
 RECOMMENDED CHOICE

ECLYPT 600
(AVAILABLE IN CORE & FREEDOM)

ECLYPT 200
(AVAILABLE IN CORE, FREEDOM & NANO)

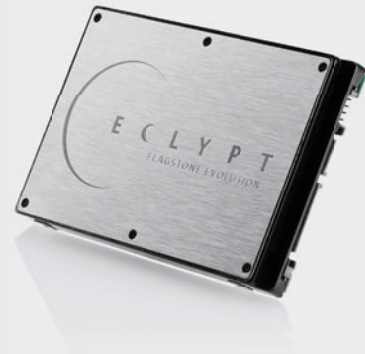

INSIDE YOUR COMPUTER

EMBEDDED DATA PROTECTION IN YOUR COMPUTER CORE

ECLYPT CORE INTERNAL HARD DRIVES

Direct encrypted replacement for a standard computer internal hard drive.

- » Protects Canadian Top Secret through Unclassified marked data
- » Available in protection levels 600 (for Top Secret through Protected C) and 200 (for Protected A and B) to match your authentication and data classification needs

OUTSIDE YOUR COMPUTER

THE FREEDOM TO WORK ON THE GO AND SWITCH COMPUTERS WITH PORTABLE DATA PROTECTION

ECLYPT FREEDOM EXTERNAL HARD DRIVES

External USB encrypted hard drive that can store, archive or back-up data and enable easy transport between different computers.

- » Protects Canadian Top Secret through Unclassified marked data
- » Available in protection levels 600 (for Top Secret through Protected C) and 200 (for Protected A and B) to match your authentication and data classification needs

ECLYPT NANO USB PORTABLE FLASH DRIVE

Encrypted USB flash drive delivers AES-256 full-disk encryption and military-grade rugged, waterproof performance in a portable thumb drive.

- » Protects Sensitive data up to Protected B
- » Protection level 200*
