

## Independent or Simultaneous Dual-channel Link 16 Voice Interface

The Viasat Multi-Platform Audio Component (MAC) is a rugged interface unit that provides independent or simultaneous dual-channel Link 16 voice (receive and transmit). It features a custom built 30 W quad-speaker system that has been specifically tuned to enhance audio quality.

The internal adjustable amplifiers can be configured through a web interface to operate any MIDS or STT platform and is compatible with most headsets and handsets.

For the voice interface, the H-250 headset is recommended, which comes standard with the MAC system.

The MAC operates with the integrated AC ruggedized power supply, but also has the flexibility to work with a 9 to 36 VDC source.

The device offers a Push-to-Talk (PTT) deactivate function that mutes the speakers when the handset PTT is pressed.

All web interface functionality for the MAC requires Viasat's Multi-Platform Integrated Controller (MIC), which is sold separately.

### SYSTEM AT-A-GLANCE

#### Features

- » 30 W Speaker System
- » Remote Monitoring & Control (MIC Required)
- » 9 to 36 VDC Input

#### Accessories and Interface Cables

- » MIC/MAC Interface Cable
- » H-250 Handset
- » Rugged AC Power Supply (AC to 12 VDC)

#### Specifications

- » **Input Power** 9 to 36 VDC (115 to 240 VAC adapter included)
- » **Dimensions (W x H x D)** 8.5 x 1.72 x 11 in.
- » **Weight (Approximate)** 5 lbs

#### Ordering Information

- PN: 1255401** Multi-Platform Audio Component (MAC)
