

# SECURITY RISK ASSESSMENT AND REDUCTION SERVICES

## Prove Your Resiliency to Management

All we need is a few weeks and you'll have a detailed report validating your security investments, along with a clear action plan to improve upon any weaknesses.

With assessment services that span operational and information technology systems, you receive a comprehensive view of the security vulnerabilities affecting your business. By leveraging those findings and building off existing infrastructure investments, Viasat helps you affordably and efficiently take your cybersecurity from good to great.

## Step 1

### Penetration Testing & Vulnerability Assessment

- » Service and network exploitations
- » Social engineering
- » Security gap analysis
- » Comprehensive and actionable reporting

## Step 2

### Implementation & Security Training

- » Detailed and tailored improvement roadmap
- » Identification of investments that will provide the greatest return
- » Employee education and training programs

### SUPPORT FOR BUSINESSES OF ALL SIZES

- |                                                            |                                                           |
