

ECLYPT IS THE HARD DRIVE ENCRYPTION LEADER IN THE UK WITH CESG ASSISTED PRODUCTS SCHEME (CAPS) ACCREDITATION

Do you have data-at-rest that needs to be protected? Do you need to meet HMG cryptographic standards? >>> ViaSat Eclipt data-at-rest hardware has been accredited by CESG and is trusted by governments, defence departments, and law enforcement agencies worldwide to protect data of any classification level from top secret through unclassified. In the event of computer theft, loss, or attack, Eclipt ensures your hard drive's data is encrypted and secure.

CESG, the UK national technical authority for information assurance, enables products to be cryptographically verified to HMG cryptographic standards and formally approved for use by HMG and other appropriate organisations. CAPS approval entails rigorous reviews of all security and cryptographic elements of a product including detailed code reviews.

With ViaSat Eclipt hard drives, you can reduce Top Secret data to Confidential, Secret to Restricted, and Confidential to Not Protectively Marked when your computer is powered down. Hardware-based ViaSat Eclipt data encryption is available in a variety of configurations: Core internal hard drive, Freedom external hard drive, and Nano ultra-portable memory stick. Simply choose the optimal protection level and form factor to meet your data-at-rest security needs.

WHICH PROTECTION LEVEL IS RIGHT FOR YOUR DATA?

		PROTECTIVE MARKING	IMPACT LEVEL				
Ministry of Defense Central Government	Ministry of Defense	TOP SECRET	6	↓	✓		
	Central Government	SECRET	5	↓	✓		
Local Government National Health Services	Local Government	CONFIDENTIAL	4	↓		✓	
	National Health Services	RESTRICTED	3	↓			✓
Enterprise/Corporations	Enterprise/Corporations	PROTECT	1 and 2	↓			✓
Enterprise/Corporations	Enterprise/Corporations	UNCLASSIFIED	0	↓			✓

↓ REDUCTION IN PROTECTIVE MARKING BY ENCRYPTION
 ✓ RECOMMENDED CHOICE

ECLYPT 600 ENHANCED
 (AVAILABLE IN CORE, NANO & FREEDOM)

ECLYPT 400 BASELINE+
 (AVAILABLE IN CORE, NANO & FREEDOM)

ECLYPT 300 BASELINE
 (AVAILABLE IN CORE, NANO & FREEDOM)

ECLYPT 200 FIPS 140-2
 (AVAILABLE IN CORE, NANO & FREEDOM)

INSIDE YOUR COMPUTER

EMBEDDED DATA PROTECTION IN YOUR COMPUTER CORE

ECLYPT CORE INTERNAL HARD DRIVES

Direct encrypted replacement for a standard computer internal hard drive.

- » Protects UK Enhanced through FIPS marked data
- » Available in protection levels 600, 400, 300, and 200 to match your authentication and data classification needs

OUTSIDE YOUR COMPUTER

THE FREEDOM TO WORK ON THE GO AND SWITCH COMPUTERS WITH PORTABLE DATA PROTECTION

ECLYPT FREEDOM EXTERNAL HARD DRIVES

External USB encrypted hard drive that can store, archive or back-up data and enable easy transport between different computers.

- » Protects UK Enhanced through FIPS marked data
- » Available in protection levels 600, 400, 300, and 200 to match your authentication and data classification needs

ECLYPT NANO USB FLASH DRIVE

Encrypted USB flash drive delivers AES-256 full-disk encryption and military-grade rugged, waterproof performance.

- » Protects UK Enhanced through FIPS marked data
- » Available in protection levels 600, 400, 300, and 200 to match your authentication and data classification needs
