

MANAGED SECURITY SERVICES

Save Hours of Stress and Uncertainty

Did you respond fast enough? Do you have the right staff? Give us a month to show you how easy and affordable it can be to outsource your cybersecurity management.

Through a combination of highly-cleared and certified experts, tested and refined processes, and continuous integration of the best security technologies available, Viasat provides the following managed services

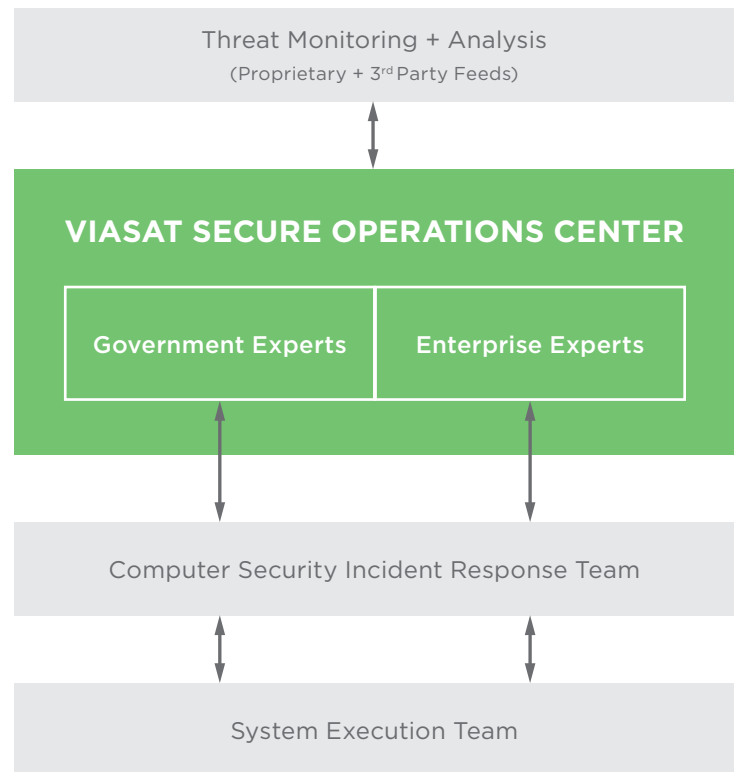

- » 24/7 Secure Operations Center
- » Threat correlation across multiple vectors
- » Prioritized incident response, orchestration, and automation
- » Customizable reports and metrics to support various levels of stakeholders

Questions You Can Immediately Answer

- » Do I have threats inside my network?
- » Are my mobile devices properly configured?
- » Was that attack an anomaly or are there more coming?
- » Is my security compliant with industry standards?

Protecting Our Networks and Yours

At the core of Viasat's security experience is protecting live networks to deliver high-quality, uninterrupted connectivity. As a worldwide Internet Service Provider, we've been securing our own operational networks for years, preventing millions of attacks weekly from reaching subscribers and automatically mitigating against Distributed Denial of Service (DDoS) attacks. We've also accumulated years of cyber threat intelligence, and as a longtime defense contractor, we have insight into the some of the most sophisticated, well-funded attacks. Our team has a unique view on the threat landscape and a dedication to providing you with comprehensive and efficient cybersecurity.
